

Instructions and Sizing Chart

Installation Instructions:

Solving all your pet tag problem is a snap with Taggles!

You do not need to remove your pet's tags from the collar. Although is not necessary, you may wish to place all tags on a single ring for a neater finished appearance.

Begin by pulling the Taggles flap down, separating the hook-and-loop surfaces. Make sure the "V"-slot is facing you.

1

Slide one side of your pet's tags sideways through the "V"-slot in the Taggles pocket.

2

Tuck opposite side of tags into the pocket. It may help to lift the "V"-slot from underneath with your finger.

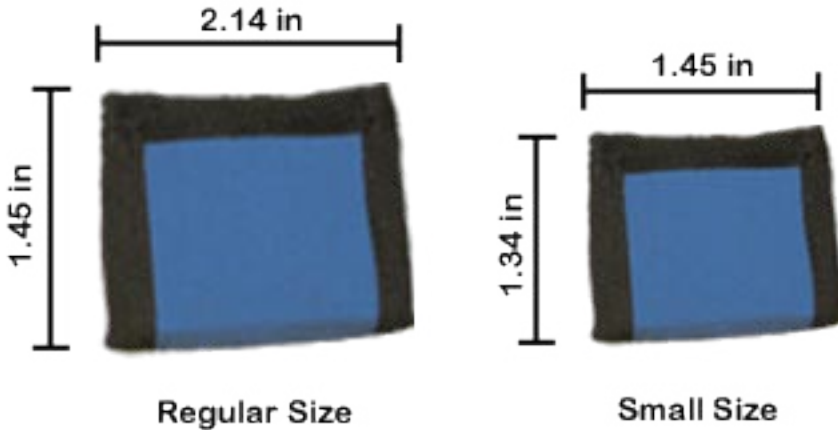

3

Close and securely refasten the flap. That's all there is to it!

Sizing Chart:

Choose your Taggles based on the size of your pet's tags, NOT the size of your pet. Both sizes of Taggles can be worn comfortably by your pet regardless how big he/she is.

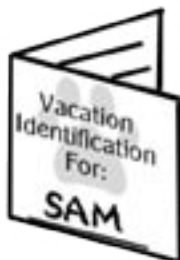

The size charts below so the maximum width of a tag that will fit in each size Taggles. All Taggles can accommodate 3-4 tags at once depending on the thickness of each tag.

Taggles Size Chart	
Tag Size	Taggles Size
up to 1 in wide	Small
up to 1-1/2 in wide	Regular
Taggles can accommodate 3-4 tags at once depending on the thickness of the tags.	

Vacation ID:

When you move to a new address, or when you travel with your pet, the contact information on his ID tag is, for a while, inaccurate -- the address and phone number show on that tag is not where YOU can be reached!

Each Taggles package includes a Vacation ID form. You can use it to provide temporary contact information for you and your pet when you are away from home.

I'm on Vacation until:	10/15
At:	Daisyhill Resort & Spa
	1354 Hydrant Way
	Rolling Hills, CA
Phone:	913-555-3546

To use the vacation ID, simply fill out the correct information, fold it in half, and slip it inside the pocket of your Taggles.
